

STORMWATER INSPECTION REPORTS FOR CONTRACTORS

It is a legal requirement to have a Stormwater Pollution Prevention Plan (SWPPP) on nearly every active construction project, including detailed records of site inspections, best management practices (BMP) maintenance, and corrective actions taken at the jobsite.

Companies that fail to adequately document and retain the results of their self-inspections and follow-up measures may face enforcement actions and devastating penalties of up to \$37,500.00 per day, per violation.

NO RECORD = IT DIDN'T HAPPEN!

The Stormwater Inspection Reports for Contractors mobile app was developed as an electronic documentation tool for construction operators to quickly and easily prepare their stormwater inspection and corrective action reports right from their iPad.

- Simple user interface
- Step-by-step jobsite documentation
- Detailed instructions for each section
- Date and time-stamped photo documentation
- Electronic signature capture
- Easily export PDF reports via email for archiving
- 10 free reports

Based on the new Inspection Report Template and Corrective Action Report Form developed by the U.S. Environmental Protection Agency (EPA) in conjunction with the Associated General Contractors of America (AGC), the customizable, digital reports can be used to help contractors meet the minimum reporting requirements of their construction stormwater permits.

STORMWATER MANAGEMENT RESOURCES FOR CONTRACTORS

Stormwater Compliance: How to Keep Effective Documentation – On-Demand Webinar

Product Code# WB180

If your company wants to stay in compliance with the myriad stormwater runoff requirements, you need an effective document management system. All stormwater permitting authorities require a site-specific Stormwater Pollution Prevention Plan (SWPPP) as well documentation of inspections, findings, and maintenance and repair of all BMPs. In the case of an audit or incident, government enforcers will want to see written proof of your compliance.

The Associated General Contractors of America's Environmental Forum Steering Committee members worked with EPA staff to develop customizable "templates" to help contractors develop a SWPPP and document the site inspections and corrective actions required by EPA's 2012 Construction General Permit (CGP). EPA's federal stormwater permit serves as a model for permits issued in states authorized to implement the federal stormwater program.

Stormwater Management During Construction – Online Course

Product Code# 9204

This course has been developed for the Erosion Control Supervisor Responsible for the proper installation, maintenance and inspection of Best Management Practices (BMPs) for the control of erosion and sedimentation at construction sites.

Topics Covered:

- Regulatory Requirements
- The Problem of Erosion and Sedimentation
- Best Management Practices for Erosion Control
- Best Management Practices for Sediment Control
- Materials Handling and Waste Management
