

2017 WORK ZONE SAFETY STUDY

SURVEY SAYS...

44% of respondents (**up 13% from 2016**) reported in the last 12 months there being **at least one crash** involving a moving vehicle at a highway work zone they operate.

Nearly **9 out of 10** of respondents believe work zone motor vehicle crashes are a **very serious or serious potential safety hazard***

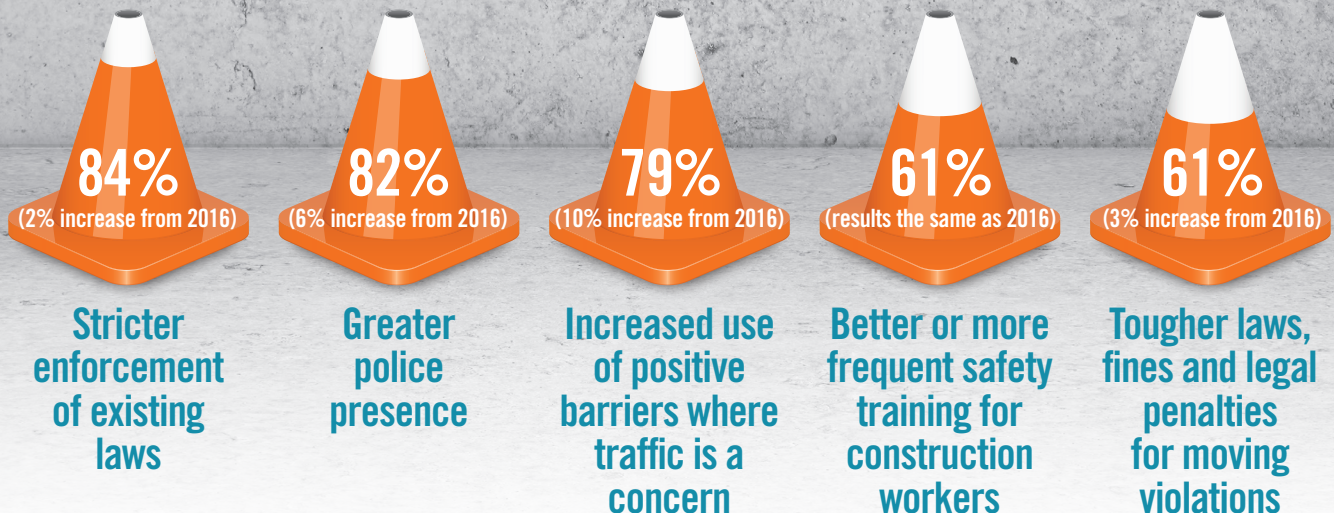

Results the Same as 2016

More than **3 out of 4** still feel motor vehicle crashes are a **greater risk today than they were a decade ago.**

What would help reduce the # of crashes, injuries and/or fatalities in work zones?

*Compared to other potential work zone safety hazards.
All information collected from the AGC of America 2017 Work Zone Awareness Week Survey
