

AGC of America
THE ASSOCIATED GENERAL CONTRACTORS OF AMERICA

Quality People. Quality Projects.

AGC Chapter Safety Survey Summer 2013 Report

**SAFETY & HEALTH COMMITTEE MEETING
Chapter Leadership Subcommittee**

AGC of America

THE ASSOCIATED GENERAL CONTRACTORS OF AMERICA

Quality People. Quality Projects.

The Associated General Contractors of America (AGC), the voice of the construction industry, is an organization of qualified construction contractors and industry related companies dedicated to skill, integrity, and responsibility. Operating in partnership with its Chapters, the association provides a full range of services satisfying the needs and concerns of its members, thereby improving the quality of construction and protecting the public interest.

AGC is the nation's largest and oldest construction trade association, established in 1918 after a request by President Woodrow Wilson. Wilson recognized the construction industry's national importance and desired a partner with which the government could discuss and plan for the advancement of the nation. AGC has been fulfilling that mission for the last 85 years.

AGC is dedicated to improving the construction industry daily by educating the industry to employ the finest skills, promoting use of the latest technology and advocating building the best quality projects for owners—public and private. AGC is committed to three tenets of industry advancement and opportunity: ***Skill, Integrity, and Responsibility.***

Safety and health on job sites is an important function for the workplace today. AGC is committed to keeping our members' jobsites safe and productive by offering services and products such as – AGC's Construction Tool Box Safety Talks, products and training, and various services made available through the individual chapters and divisions.

The publication highlights the safety and health services and products available through the various chapters. This listing may not be inclusive of all services and chapters. Please contact the individual chapters for more information.
